Hands-on-Session – ESC 2018

1. Go to URL: https://github.com/EMSC-CSEM/Hands-on-Session

2. Click on **Clone or download** (green button)
   - Then, on **Clone with HTTPS** or **download ZIP**

3. The repository is composed of:
   - 2 pdf files (guidelines + poster)
   - 1 shell script (exercise)
   - 16 chunks of Python code (exercises)

4. Please get starts with the **Hands-On-Session** pdf file
   - Follow the guidelines: let yourself be guided step by step through the exercises (execute ready-to-use pieces of code)

5. Chunks of code are written in Python language (version 2.7) and the following packages are required and must be installed before to be run:
   - Requests
   - Tornado
   - Obspy
   - Pymongo
